ES Limited 3/5

Summary

- Full-stack software engineer with founding-engineer and engineering-management experience, delivering products across logistics, fintech, and consumer platforms.
- Led CRM integrations and customer onboarding, improved AWS infrastructure, and managed a five-person engineering team.
- Built an open-source Python/Neo4j agent with approval controls and evaluation workflows.

Projects

World Cup Graph Agent
View project

Built an open-source Python/Neo4j agent demo using LangChain DeepAgents, with separate approvals for external research and graph writes. Implemented access controls, multi-turn evals, and tracing. Added AWS AgentCore and GCP Cloud Run deployments.

Conciser
View project

Research project investigating how vocabulary training (expressing complex ideas in fewer words) can impact one's AI prompting precision, writing time, and iteration count. Designed a learning app for contextual vocabulary practice.

Experience

Revenue Vessel

Founding Software Engineer
Sep 2024 – Feb 2026 • 1 year 6 months
São Paulo, Brazil • Remote

• Led development of HubSpot and Salesforce integrations for a logistics data platform, replacing manual spreadsheet imports with one-click and list-based syncing of contact, company, and logistics data; reduced CRM data preparation and import from days to minutes.

• Onboarded customer IT and sales teams through OAuth setup, property mapping, and custom logistics filters; debugged issues live and shipped follow-up fixes in one- to two-day feedback cycles.

• Implemented AWS KMS envelope encryption for customer OAuth tokens and extracted shared OAuth components; led SOC 2 readiness work across AWS network separation, Twingate, Firebase MFA, and Heroku Private Spaces connectivity to AWS.

• Built logistics data ingestion pipelines with BullMQ, AWS S3, PostgreSQL, and Snowflake.

• Shipped CRM features through spec-driven AI-assisted development, using product requirements, implementation plans, stacked PRs, and human review; established automated testing with GitHub Actions, Jest, and Playwright, and managed CodeRabbit PR reviews.

Keep

Tech Lead → Engineering Manager • Cards
Feb 2024 – Jul 2024 • 6 months
São Paulo, Brazil • Remote

• Led a five-person Cards team, owning roadmap delivery with Product for Apple Pay and Google Wallet integrations and supporting the Mastercard physical-card rollout.

• Implemented web-based card PIN entry and the i2c verification integration; worked directly with i2c engineers to diagnose issues, test fixes, and unblock delivery.

• Coached engineers through pairing and mentoring; replaced daily stand-ups with asynchronous Slack updates and project status reporting in Linear.

Reelgood

Lead Software Engineer • Web
Sep 2022 – Feb 2024 • 1 year 6 months
São Paulo, Brazil • Remote

• Led web engineering and shifted team from weekly to daily releases, and async status updates.

• Migrated the codebase from JavaScript to TypeScript and introduced Cypress integration testing.

Senior Software Engineer • Web
May 2022 – Sep 2022 • 5 months
São Paulo, Brazil • Remote

• Migrated web deployments from Jenkins and AWS Elastic Beanstalk to GitHub Actions and AWS App Runner, reducing web infrastructure costs by 25% and deployment time from ~40 to ~10 minutes.

• Automated per-PR preview environments with GitHub Actions and App Runner, creating services when needed and deleting them when PRs closed, without requiring a Next.js migration.

• Built an in-house web analytics and telemetry pipeline with React and RxJS.

Technical Skills

- Language: C#, Go, Python, Rust, SQL, TypeScript.
- Web & Data: Angular, Neo4j, Next.js, Node.js, PostgreSQL, React, Snowflake, Vue.js.
- Cloud & Delivery: AWS, Docker, GitHub Actions, Google Cloud, Heroku, Jenkins.
- Testing & Tools: BrowserStack, Cypress, Jest, Playwright, Pytest, Retool.
- AI: AWS Bedrock, GCP Gemini Enterprise, LangChain, LangGraph, OpenRouter.

Certifications

Certified Solutions Architect
Amazon Web Services (AWS)
See credential

SAA-C03 validates knowledge of designing secure, resilient, high-performing cloud architectures and optimizing costs using the AWS Well-Architected Framework and services including EC2, S3, VPC, and IAM.

Certified AI Practitioner
Amazon Web Services (AWS)
See credential

AIF-C01 validates foundational knowledge of artificial intelligence, machine learning, generative AI, foundation models, and responsible AI practices, including Amazon Bedrock, and Amazon SageMaker.

Specializations

Project Management
Google
See credential

Project lifecycle, including initiation, project planning, execution. Agile, Scrum, risk management, and stakeholder management.

RAG and Agentic AI
IBM
See credential

Building retrieval-augmented generation (RAG) applications and agentic workflows, using vector databases for information retrieval, LLM tool calling, and frameworks such as LangChain and LangGraph.

Altruist

Software Engineer • Tools
Dec 2020 – Jul 2021 • 8 months
São Paulo, Brazil • Remote

• Led development of Retool dashboards and internal operations tools, isolated encryption server; replaced spreadsheet-and-email workflows and reduced hour-long tasks to seconds.

• Owned back-office encryption services and end-to-end testing with BrowserStack and Cypress.

Booking.com

Front-End Engineer • Tools
Dec 2018 – Mar 2019 • 4 months
Amsterdam, Netherlands • On-site

• Owned live-chat interfaces for customer-service staff.

• Supported the Vue.js migration, and added automated UI tests.

Front-End Developer • Chat
Aug 2018 – Nov 2018 • 4 months
Amsterdam, Netherlands • On-site

• Built live-chat and chatbot interfaces used by more than one million users.

Front-End Developer • Support
Oct 2017 – Aug 2018 • 11 months
Amsterdam, Netherlands • On-site

• Developed self-service support tools used by millions of users.

• Built Chrome extension for ML team to change in-browser experiment settings.

• Ran A/B experiments and user research sessions to improve customer-service tools.

niluk.app

Software Engineer • Mobile (part-time)
Feb 2018 – Jan 2019 • 1 year
Amsterdam, Netherlands • On-site

• Built a mobile event-discovery prototype and presented it at Web Summit Lisbon 2018;

• Presented to mentors and investors, receiving funding from the City of Amsterdam.

HeyJobs

Front-End Engineer • Web
Jul 2016 – Apr 2017 • 10 months
Berlin, Germany • On-site

• Built job-post distribution, application, and CV PDF-generation features, informed by live user research.

Quantler

Front-End Developer • Web
Aug 2015 – Jul 2016 • 1 year
São Paulo, Brazil • Remote

• Built frontend of an algorithmic trading platform; Led React migration, and trained team members.

Education

Toledo Prudente Centro Universitário
B.Sc. Information Systems · Dropout
2015–2016

Universidade Estadual Paulista Júlio de Mesquita Filho (Unesp)
B.Sc. Computer Science · Dropout
2014–2015

Upwork

Freelance Designer
Jun 2013 – Aug 2015 • 2 years 3 months
São Paulo, Brazil • Remote

• Delivered web design and PHP/MySQL development for local and international clients.

Toledo Prudente Centro Universitário

Web Development Intern • Tools
Feb 2015 – Apr 2015 • 3 months
Presidente Prudente, São Paulo, Brazil • On-site

• Built full-stack features for a college-wide ASP.NET event-management system.
