Hadrian de Oliveira

Lead Engineer • Cloud & AI
São Paulo, Brazil

Summary

Lead Software Engineer and Solutions Architect with 13+ years experience turning complex requirements into reliable, business-driven software, including Full-Stack Web, Mobile, QA, DevOps, and Engineering Management

Experience

Revenue Vessel

Founding Software Engineer
September 2024 - February 2026 (1 year 6 months)
São Paulo, Brazil

• Owned end-to-end development and customer onboarding of a logistics industry-first CRM sync solution integrating HubSpot and Salesforce, with custom filters and property mapping directly from the product UI, reducing sales team setup time from days to minutes

• Engineered logistics data ingestion pipelines (with BullMQ, AWS S3, PostgreSQL, Snowflake), and location-based search powered by Google Maps Geocoding

• Led infrastructure and application hardening for SOC2 compliance; implemented AWS VPC network segmentation, Twingate connectors, Multi-Factor Authentication (Firebase Auth), and automated package vulnerability monitoring

• Established continuous integration and automated testing using GitHub Actions, Heroku, Jest, and Playwright, while embedding automated AI code-reviews (CodeRabbit and GitHub Copilot) to optimize team velocity

• Defined and rolled out agile delivery practices (scope/estimate/handoff) and drove adoption of retrospectives and team-health initiatives

Keep

Engineering Manager • Cards
February 2024 - July 2024 (6 months)
São Paulo, Brazil

• Delivered virtual credit card integration supporting Tap to Pay via Apple and Google wallets, with multi-org card and credit management, including i2c authentication

• Supported development of infrastructure and partnership enablement for Mastercard physical credit cards, including international shipping and payment flows

• Led a 5-person Cards engineering team through 1:1s, performance management, mentoring, and pairing while owning roadmap scoping and execution with Product

• Introduced async-first engineering workflow that reduced interruptions, accelerated high-priority releases ahead of schedule, and improved team morale

Reelgood
1 year 10 months

Lead Software Engineer • Web
September 2022 - February 2024 (1 year 6 months)
São Paulo, Brazil

• Led the web engineering team through a period of triple-digit company YoY growth in 2023

• Drove Core Web Vitals and SEO improvements from ~40 to ~80 (Lighthouse and Search Console)

• Migrated codebase from JavaScript to TypeScript and introduced Cypress integration testing

• Owned technical direction for performance, and reliability on a high-traffic consumer web platform

• Shifted team from weekly to daily agile release cadence

Senior Software Engineer • Web
May 2022 - September 2022 (5 months)
São Paulo, Brazil

• Reduced web infrastructure costs by 25% and cut deployment duration from ~40 min to ~10 min, by migrating from Jenkins CI and AWS Elastic Beanstalk to GitHub Actions CI and AWS App Runner

• Built in-house high-throughput web analytics and telemetry pipeline with React and RxJS

Altruist
Software Engineer • Tools
December 2020 - July 2021 (8 months)
São Paulo, Brazil

• Built back-office automation tools that compressed hour-long operational tasks into seconds and earned FINRA recognition for audit quality

• Developed dashboards and tooling with SQL and Retool that measurably improved ops efficiency

• Owned back-office encryption services, and end-to-end testing with BrowserStack and Cypress

Booking.com
1 year 6 months

Front-End Engineer • Tools
December 2018 - March 2019 (4 months)
Amsterdam, Netherlands

• Owned live chat UI for customer-service agents and supported codebase migration to Vue.js

• Implemented automated UI testing, improving reliability of internal agent-facing applications

Front-End Developer • Chat
August 2018 - November 2018 (4 months)
Amsterdam, Netherlands

• Developed live chat and chatbot interfaces used by million+ users

Front-End Developer • Support
October 2017 - August 2018 (11 months)
Amsterdam, Netherlands

• Developed self-service issue-resolution tools and FAQs that reduced customer-support load

• Ran A/B experiments, user research sessions, and developed web-based CS tooling

niluk.app
Software Engineer • Mobile
February 2018 - January 2019 (1 year)
Amsterdam, Netherlands

• Built a mobile app prototype for event listing to support social networking in big cities

• Presented the product at Web Summit Lisbon 2018, secured funding from the City of Amsterdam, and collaborated on research projects with local universities

• Pitched technical progress and roadmap to mentors and investors

HeyJobs
Front-End Engineer • Web
July 2016 - April 2017 (10 months)
Berlin, Germany

• Developed web features for job-post distribution, simplified application, and CV PDF generation

• Conducted live user research sessions to inform product direction

Quantler
Front-End Developer • Web
August 2015 - July 2016 (1 year)
São Paulo, Brazil

• Developed the frontend of an algorithmic trading platform and marketplace for trading models

• Led migration from Angular to React and onboarded/trained new team members

Upwork
Freelance Designer
June 2013 - August 2015 (2 years 3 months)
São Paulo, Brazil

• Delivered web designs (Adobe Fireworks), full-stack web development (PHP + MySQL), and long-form presentation designs (PowerPoint) for local and international clients

Toledo Prudente Centro Universitário

Web Development Intern • Tools

February 2015 - April 2015 (3 months)

Presidente Prudente, SP

• Developed full-stack features for college-wide event management system

Education

Universidade Estadual Paulista Júlio de Mesquita Filho

Bachelor of Science, Computer Science · (2014 - 2015)

Toledo Prudente Centro Universitário

Bachelor of Science, Computer and Information Systems · (2015 - 2016)
